

Migration Interviews
AP Human Geography
Unit 2: Population & Migration

Your task for this assignment is to locate and interview **at least two different people** about their migration stories, or the migration stories of their families. Your task is to determine:

- (a) Was the migration *internal? Intra/inter-regional? International?*
- (b) Was it a *chain* migration? *Voluntary? Circular?*
- (c) What were the *pull factors* and *push factors* involved?
- (d) Did you hear any interesting details or stories about *obstacles* to migration?

If your interviewee does not know these terms, it will be your responsibility to ask the necessary questions to discover the appropriate information! Be sure you are familiar with these terms so you know what to ask for!

Please summarize the information neatly, but in complete sentences. Provide explanations of how and why you answered each of the questions above.

Note: not every person or family has a migration story they are familiar with or comfortable sharing. If this is the case, find a friend who is willing to be interviewed, or a faculty member at the school.
