

Unit 1 Terminology
(Topics 1.1~1.7 in AMSCO review book)

Topic 1.1

physical geography human geography time-distance decay spatial patterns geospatial data scales of analysis reference maps political maps physical maps	choropleth maps isoline maps topographic maps cartogram scale (small-scale, large-scale) absolute location latitude equator longitude prime meridian	International Date Line relative location distribution elevation clustered dispersed
--	---	---

Topic 1.2

landscape analysis	spatial data	
--------------------	--------------	--

Topic 1.3

GPS remote sensing	GIS community-based solutions	
-----------------------	----------------------------------	--

Topic 1.4

location place region site situation toponyms	time-space compression friction of distance distance decay spatial association	
--	---	--

Topic 1.5

natural resources renewable/non-renewable sustainability	built environment cultural landscape environmental determinism possibilism	
--	---	--

Topic 1.6

global scale national scale	regional scale (world/national) local scale	
--------------------------------	--	--

Topic 1.7

formal regions	functional regions perceptual/vernacular regions subregions	
----------------	---	--
